

- Description :

- This is a single multi spring externally mounted, reverse balanced seal specifically designed for agitator & vessels. These seals are basically used on top entry agitators for food and pharmaceutical industries where contamination of the media with any other liquid inside the agitator is not permissible. These seals do not require any external lubrication to the seal faces, hence these seals are known as dry running seals.

- Seal Features:

- Single dry running seal
- Outside mounted
- Balanced, Interchangeable mating rings & seal ring,
- Easy Installation

- Operating Limits:

- Shaft Dia : 25mm to 150mm
- Pressure : Up to 10 bar
- Temp : -20°C to 150°C
- Speed : Up to 200rpm

- Materials :

- Seal Faces – Carbon, Silicon
- Secondary Seal – Viton, FFKM, PTFE, TTV
- Metal Parts – SS316, Hast-C, Alloy-20

- Applications :

- Corrosive Chemicals
- General Chemicals
- Pharmaceutical
- Foods & Beverages
